## Renovations, Inc.

This Peters Township bathroom remodel was designed to accomplish the owner's specific goals for the space. The O'Neils wanted to eliminate their seldom used soaking tub and increase the size of the shower. They also wanted to add an additional sink and improve storage space while relocating the toilet to a more private corner. Chris Clark, the sales manager and designer responsible for this project, was able to accommodate everything on the customer's wish list. Kohler plumbing products and custom built cabinetry were combined with beautiful floor and wall tile to create a master bath retreat with ample storage, improved traffic flow, and fantastic visual appeal.

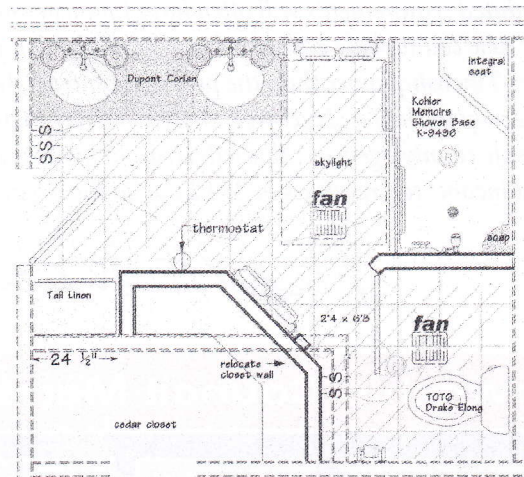

The radiant floor heating helps to keep the room comfortable in the cooler months and the addition of dimmable task lighting provides the option of adjusting the intensity to your preference. The combination of a larger vanity, linen cabinet, and opposing hidden mirrored medicine cabinets creates abundant storage. Dual Nutone fans placed on timers insure the air remains fresh and humidity free.

A metal listello running the perimeter of the shower coordinates perfectly with the brushed nickel fixtures and the grey tone tile provides an appealing contrast to the white Kohler Devonshire shower base and toilet. A Fluence clear glass bypass shower door provides necessary water control while maintaining a spacious atmosphere.

The Corian vanity top with integral under mount bowls creates contrast against the darker wood vanity base. For this project, Clark Renovations made special accommodations for their customer who wanted to incorporate cabinetry hand built by the owner's father into the design.
